

## **Objectives:**

The main goal of making this website is to give the user-friendly environment of wedding event planning and arranging wedding event hassles with very budget friendly pricing. The user can easily select the event related to wedding that they want to arrange. Even they can choose some packages. Where under every packages there have some individual events also. We have some following objectives for making this website:

- ⇒ Arranging Wedding Ceremony without any hassle.
- ⇒ Preparation of legal document of a wedding, that is wedding registry.
- ⇒ Making wedding cake for any wedding anniversary or yellow night ceremony.
- ⇒ Bride Makeup facilities by our trained beautician.
- ⇒ Preparation of guest list and invitation card covering with very exciting envelop.
- ⇒ Photography session by our expert photographer with their high-resolution camera setup.
- ⇒ In order to entertain the guest, we provide fine dining services with different dishes prepared by very expert chiefs.
- ⇒ Making the deal more convenient for users in terms of budget, scheduling date and time and effort.

## **Introduction:**

Over the previous decade, the event management sector has had a lot of potential growth. We've seen a massive turnout for events focused on specific events, whether it is wedding, concert, conference or corporate event. Online wedding management is a form of electronic commerce which allows clients to directly bid on wedding plan according to their ability from the website over the internet using a web browser. Clients can easily find offered services like wedding ceremony arrangement, wedding registry, preparing guest list, wedding cake, photography, bride makeup and etc. There will be a lot of pricing plan they can select the budget friendly one for them. Pricing plan includes two options, one is package pricing and another one is individual pricing. In the package pricing we provide flexibility to our users in terms of budget. It is seen that most of the time people spend a lot to arrange every single event individually, that is why we keep some events for wedding into single packages. Thus, allowing them to pay less. Namely we include three packages, first one is basic, second one is premium and the third one is ultimate package. We kept portfolio of our previous works of different events. Every single event like wedding ceremony arrangement, wedding registry, preparing guest list, wedding cake, photography, bride makeup has individual pages with attracting photo gallery, it includes the description of the event like what we will provide and how that event will look like after the arrangement has finished. Besides these service pages also contain the pricing as well. The pricing is available here also apart from the pricing list for their convenience.

Users can also select their convenient time for scheduling the events. We have enough employers who can work on multiple events in different places and in different times. Our website also allows

users to give the positive review of our websites. They can give us messages and important suggestions. We respect their opinion; we think that users are our critics. So, their suggestions, advices and criticism will make us more perfect.

### **Motivation:**

Wedding is a significant event of human life. We all want our relatives, friends and guests to be entertained with warm hospitality. But managing every single task is very tough and hectic. Besides, managing all those tasks is time consuming as well. So, we implemented this wedding management idea to make all this stuff easier and convenient for them. If they use this website, they can bid their management easily while sitting in the home. Normally if they try to arrange all these events by themselves by calling to different personnel and organizer, this will be very difficult for them to handle everything. Because every single task requires great supervision and managing skill. Most often the general people don't have those skills, often they fail to entertain their guest with warm hospitality which is really bad for a even like wedding. Who doesn't want to keep their dignity in front of their new relatives and guests? Even if they become able to do so, it sometimes cost a lot in terms of money and time. So, in order to make all these things much much easier we designed such a website, from where they can choose their required wedding event for organizing by sitting in the home and taking no pressure at all.

### **Required Technology:**

**Frontend:** HTML, CSS, JavaScript

We use **HTML** to make the format of every single pages. We in total have **15 different web pages**. In order to make the pages attractive, we use **CSS**. For all the pages, we customize some **classes and body parts of the page** to design everything nicely and make relevant to the content. We use **JavaScript** to make some **query selector, swipers and sliders** to give the page dynamic and handy look. This is how we ended up with our frontend design successfully.

**Backend:** PHP Laravel, MySQL

We are going to use the **PHP Laravel** and **MySQL** database in the backend part to save the user inputs, log in and sign-up information, message information, location and date of events, transaction history and payment amount etc.

**Database:** MySQL

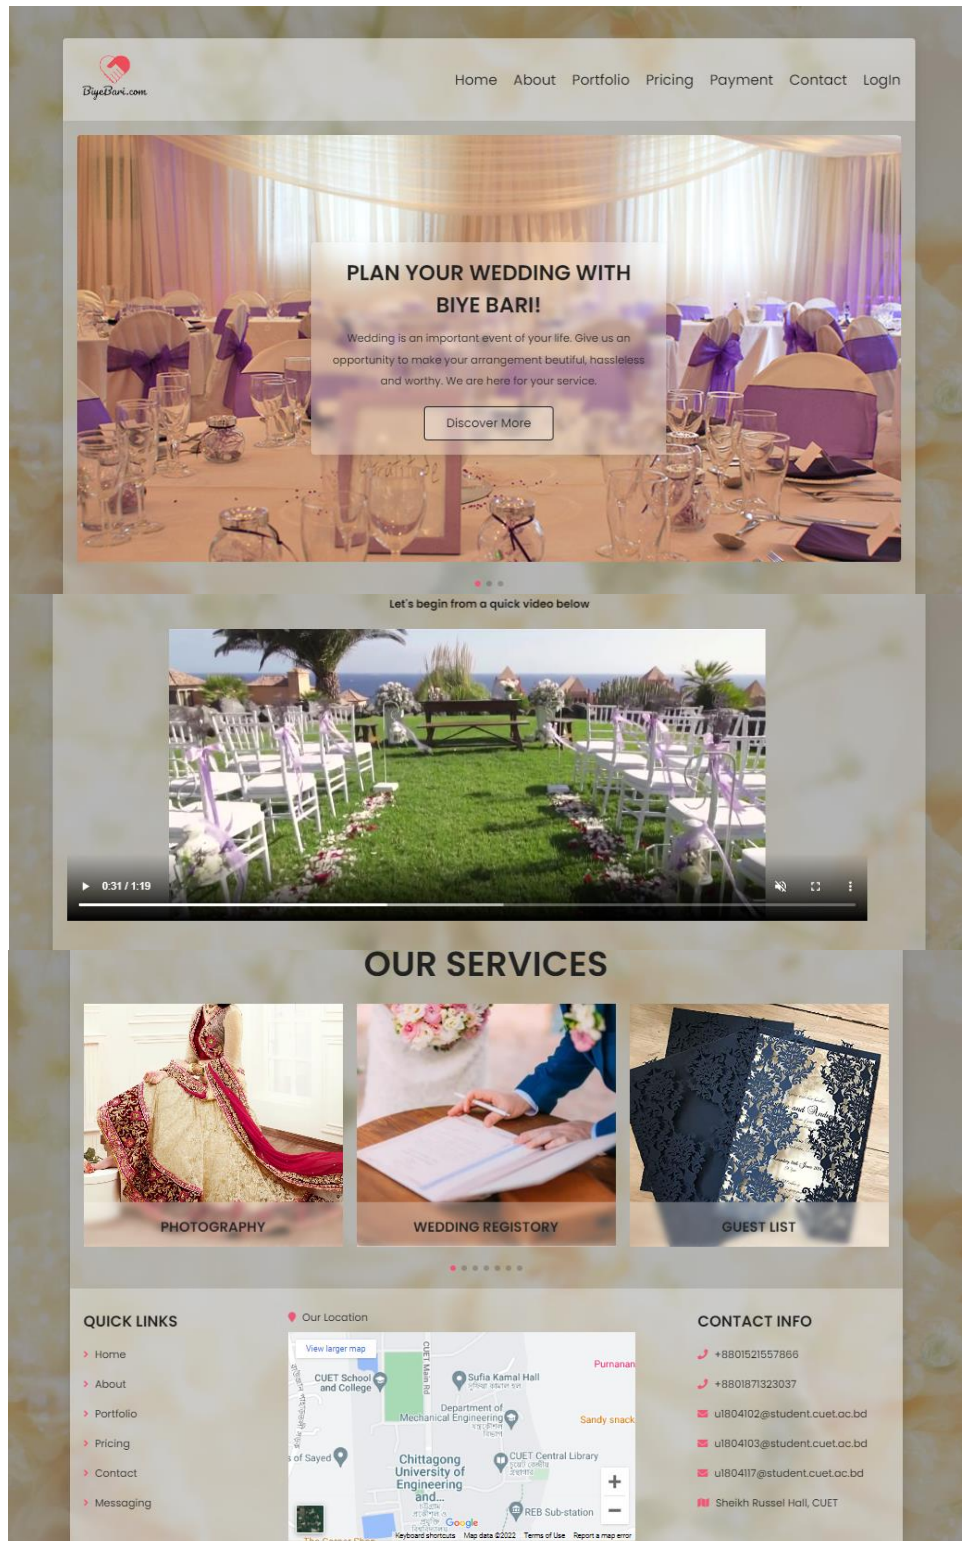

**Hosting:** Xampp, Localhost

We used Xampp and localhost in order to run the web pages and see the changes or the output of the codes that we have written.

**IDE:** Microsoft Visual Studio, Atom

## Description of Frontend:

- 1) **Home:** Home page contains the header with menu var option, the introductory images with slider and swiper. Also contains an introductory video and our given services. In the bottom of the pages we added the footer. Which contains contact information and location of us.

- 2) **About:** About page briefly describes who we are behind the development of the pages and as a wedding planner. Besides it has an inspiring description of wedding as well.

- 11) Booking:** Users can book the event by giving their details along the event schedule, address of their place and contact information.

The screenshot displays a web application interface for booking an event. At the top, a navigation bar includes links for Home, About, Portfolio, Pricing, Payment, Contact, and Login. The main heading is "BOOKING". The form is divided into two columns. The left column contains fields for "Your Name" (with placeholder "Enter your name..."), "Your Number" (with placeholder "Enter your number..."), and "Date of Event" (with a date picker showing "dd- - yyyy"). The right column contains fields for "Your E-mail" (with placeholder "Enter your e-mail..."), "Choose Plan" (a dropdown menu currently showing "Basic plan"), and "Your Address" (a large text area with placeholder "Enter your address..."). A "Submit" button is located at the bottom left of the form. Below the form, the footer is divided into three sections: "QUICK LINKS" with links to Home, About, Portfolio, Pricing, Contact, and Messaging; "Our Location" featuring a map of Chittagong University of Engineering and Technology; and "CONTACT INFO" with phone numbers (+8801521557886, +8801871323037), email addresses (ul804102@student.cuet.ac.bd, ul804103@student.cuet.ac.bd, ul804117@student.cuet.ac.bd), and a physical address (Sheikh Russel Hall, CUET). The footer also includes a copyright notice: "Created by SALMAN, FAHAD, ARAT | all rights reserved!"

- 12) Payment:** We gave multiple payment options using Bkash, Rocket and Nagad. According to the user wish he can select the desired payment option and and providing the transaction id we manually give him the confirmation of the successful payment.

- 14) Contact:** We expect that our user will contact with us and give us advices, suggestion or to know any kind of FAQ. We sincerely reply to their email.

The image shows a 'CONTACT US' form on a website. The background is a light beige with a subtle floral pattern. At the top left is a logo with a red heart and the text 'BijoyBhai.com'. To the right of the logo is a navigation menu with links: 'Home', 'About', 'Portfolio', 'Pricing', 'Payment', 'Contact', and 'Login'. The main heading 'CONTACT US' is centered in a large, bold, black font. Below the heading is a form with five input fields and a 'Send' button. The fields are labeled 'Your Name', 'Your E-mail', 'Your Address', 'Your Number', and 'Your Message'. The 'Your Address' field is larger than the others. The 'Send' button is located at the bottom left of the form area.

### **Limitations and Future Scopes:**

Though we tried to make the website responsive but due to some technical issues and traffic, the server may become down when multiple users try to access the server or any other unknown reason. Besides there can be more functionality added by some JS Framework like Bootstrap, ReactJS, NodeJS etc. As there is no practical case study yet to be done, we are not sure whether everything works perfectly or not. In future if any defects are informed by the user, we will try to fix it as soon as possible.

In near future, we believe that we can include more functionality to our website. Apart from fixed price on the packages, we may interactively give user to select the volume of their event in terms of guest numbers and sizes.

### **Conclusion:**

In conclusion, we can say that wedding is the beginning of a new chapter of life for a newly married couple. In order to happen everything perfectly in ceremony it is necessary to arrange and manage it properly. This website makes everything hassle free and reduces the sufferings of the couple and their family. We hope that this idea will be very effective for corresponding clients.
